

Symmetrical Butterflies

Complete the symmetrical drawings.

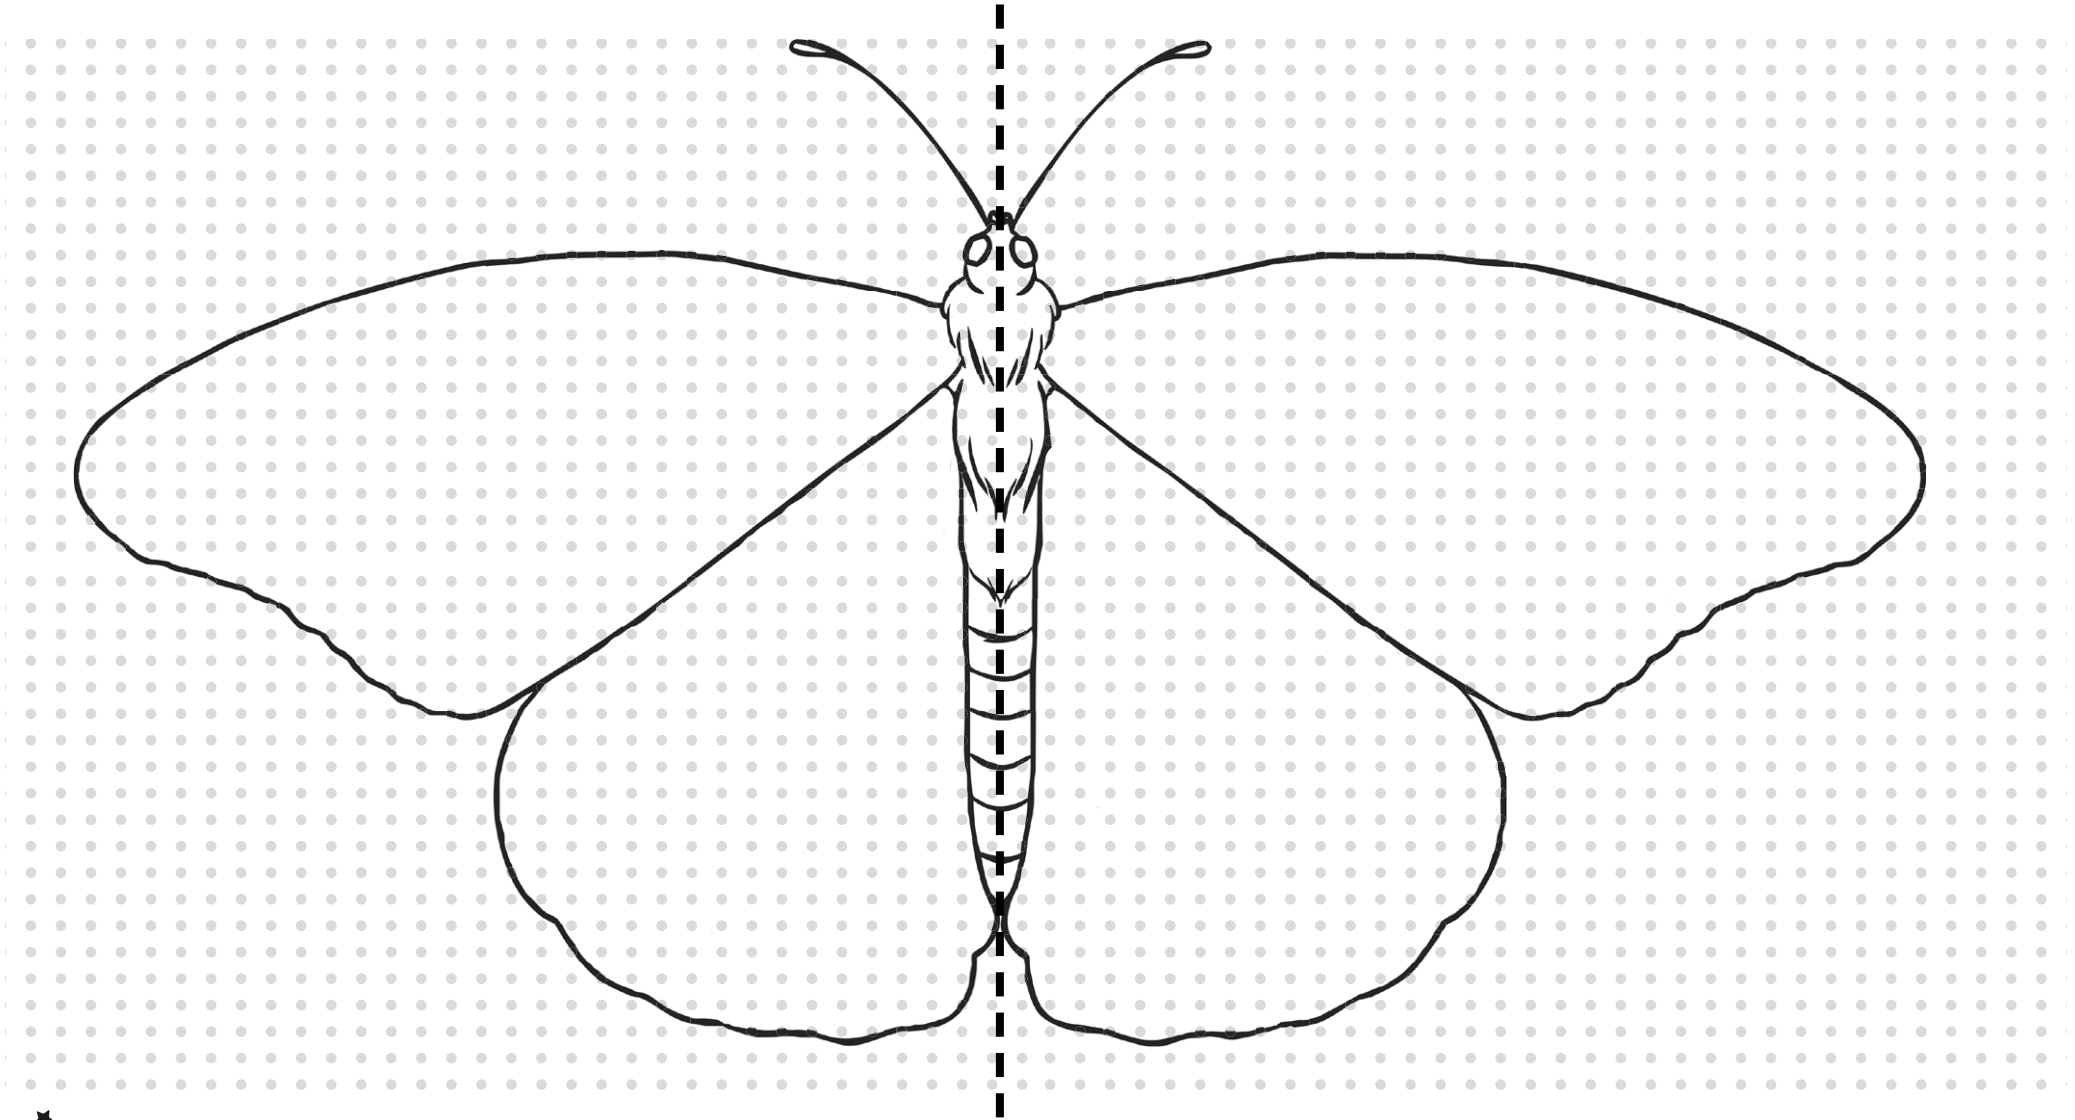

The image contains two large rectangular boxes, each representing a butterfly's body and wings. A vertical dashed line in the center of each box indicates the axis of symmetry. The left side of each box is partially filled with shapes, and the right side is blank for completion.

- Left Box:** The left side features two triangles pointing towards each other, one above and one below the dashed line. Each triangle contains a circle. The right side of the box is empty.
- Right Box:** The left side features three shapes: a hexagon at the top containing a square, which in turn contains a circle. Below these is a triangle pointing downwards containing three solid black circles. The right side of the box is empty.

Symmetrical Butterflies

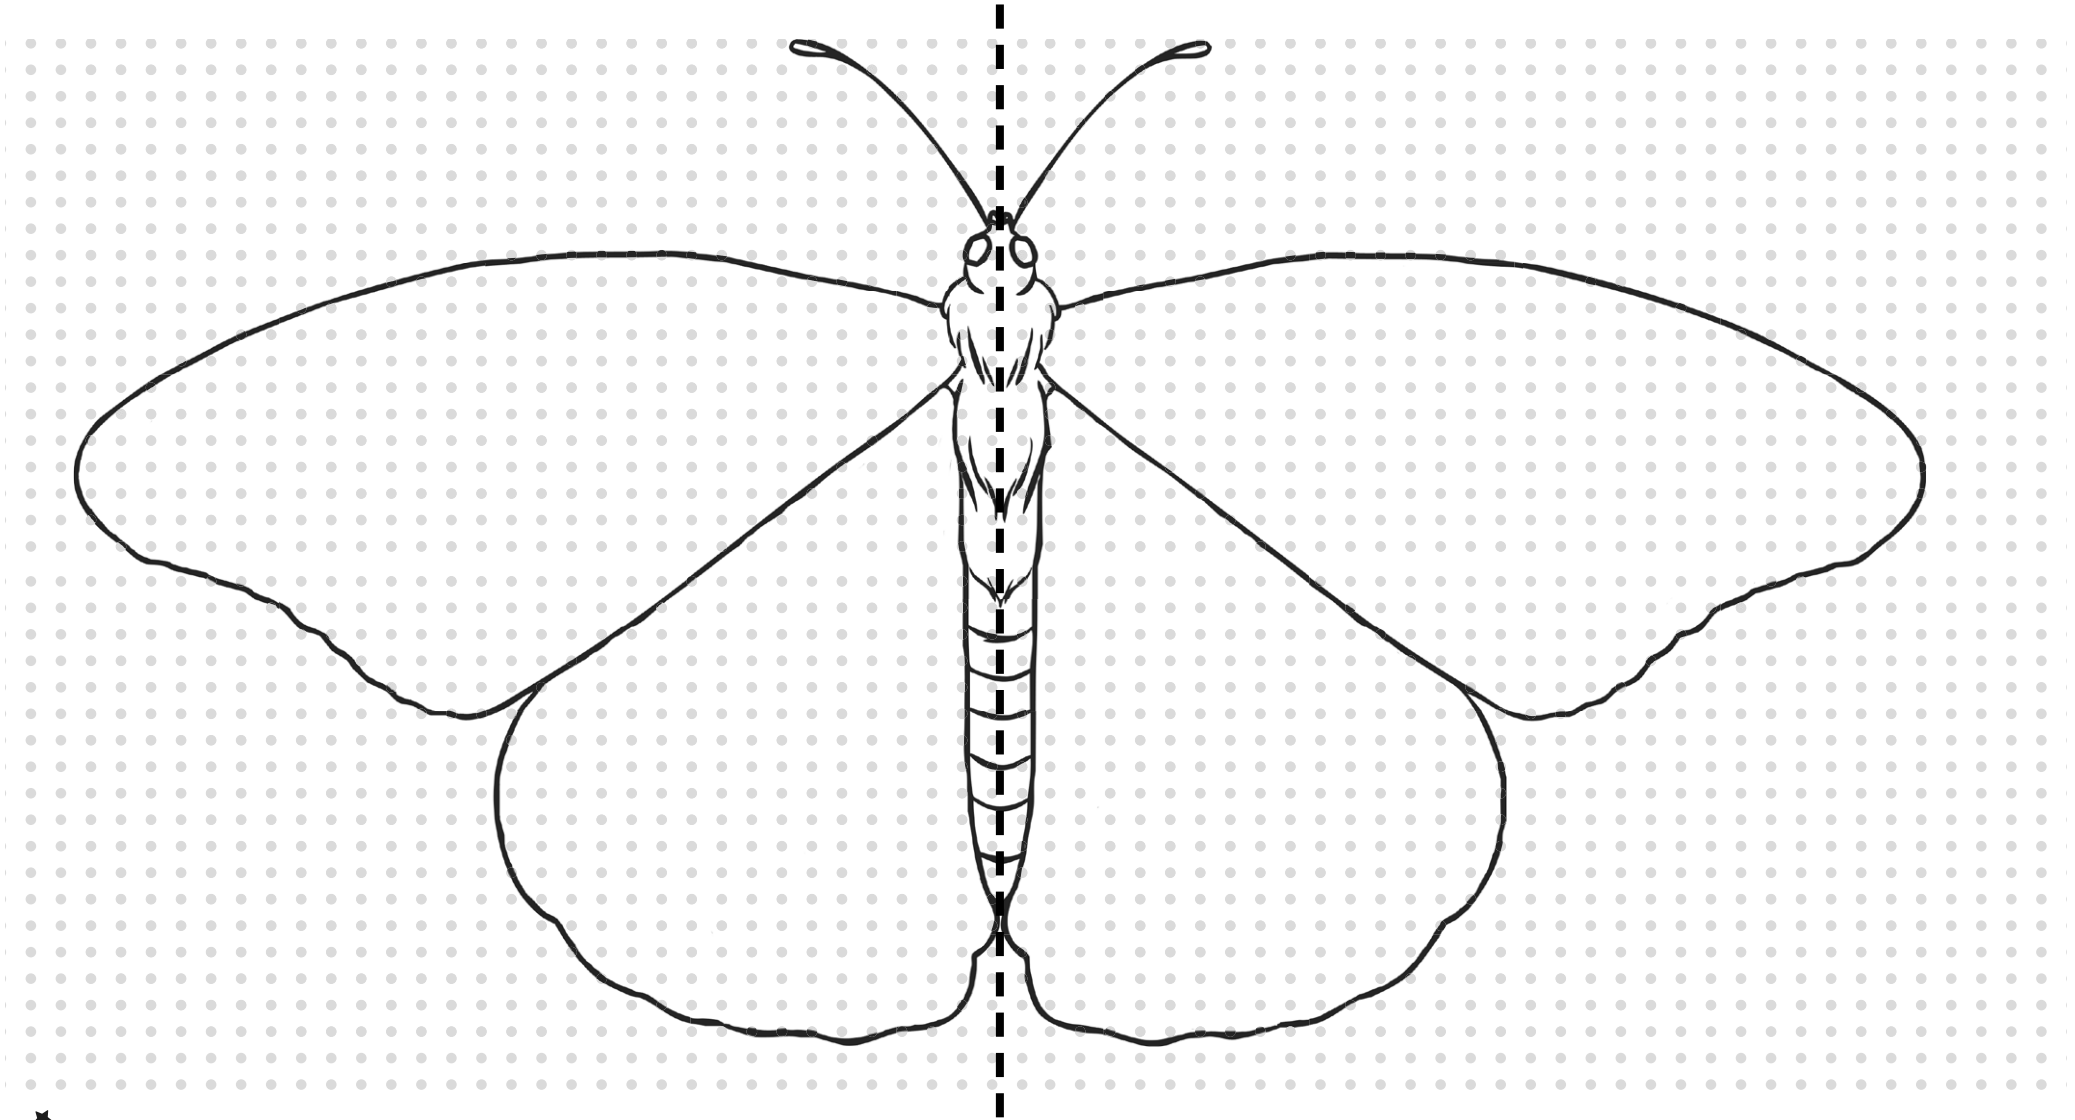

Complete a symmetrical butterfly using 2D shapes.

Symmetrical Butterflies

Complete a symmetrical butterfly using 2D shapes including pentagons and hexagons in different positions.
