

Inside a beehive

The picture shows part of the wax comb. You can see the queen bee with worker bees around her. The worker bees are feeding and grooming the queen.

You can also see some honeycomb in the picture.

Can you see some pearly white shapes in the bottom of the cells of the honeycomb? These are eggs which the queen has laid.

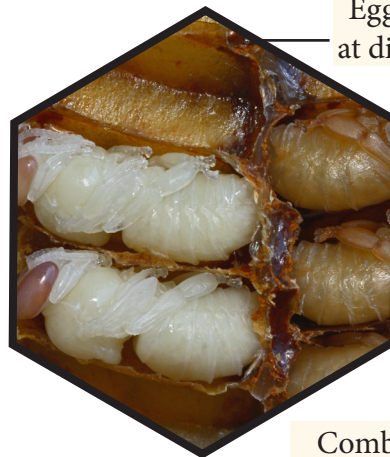

Russell Stallibrass

Label the picture with the names from the list.

- comb
- worker bee
- queen bee
- larvae

Eggs and larvae at different stages

Comb packed with pollen
