

# MU 2.4 A10: Infection control

## Task 1

Carry out a brainstorm as a group or an individual and record the ways that you can control infection on a flipchart or a separate piece of paper.

## Task 2

Now look at the two illustrations given below. For each one, identify what is wrong in the picture, and explain how to correct it.

### a Personal protective clothing

1 What is wrong in this picture? You should be able to find at least three things.

---

---

---

2 What should be happening in this picture?

---

3 What personal protective equipment is available?

---

**b Safe disposal of waste**

1 What is wrong in this picture? You should be able to find at least two things.

---

---

2 What should be happening in this picture?
